MASTERMIND SERIES FOR DIGITAL WORKFLOW

This MasterMind Series pulls back the curtain, and guides you through the processes developed by and used inside Dr. Layman's orthodontic office. Treating patients full time, in a completely 3D digital workflow, Dr. Layman curated this course for active and growing practices aware of marginalization. Dr. Bill discloses the business metrics he developed to ensure you are proficient in realizing the benefits of your investment in 3D digital technology.

Integrating his prior military and MBA training, Dr. Layman and his team distill an unnecessarily overcomplicated process demonstrating, with ease, how you can be more prosperous by realizing the potential of the latest in 3D digital orthodontic workflows. At the conclusion of this course, you will gain the confidence and experience to create: aligners in your office; digitally enhanced indirect bonding trays; and most other appliances that you currently pay a lab to fabricate. Actualize the 3D digital orthodontic workflow and broaden your orthodontic relevance.

BILL LAYMAN, DMD, MBA

LEARN FULL DIGITAL WORKFLOW AND EXPERIENCE LIVE PATIENT DELIVERIES

Clearwater, FL • 8:00 a.m. – 5:00 p.m.

Friday, October 25, 2019
